Learning Objectives

You'll be able to:

Measure and monitor energy usage in existing buildings.

Review applicable energy conservation codes and predict payback on energy conservation investments.

Use spreadsheet and database tools to analyze energy usage and quantify savings.

Evaluate existing HVAC, lighting and control systems for possible upgrades.

Estimate return on investment and monitor actual results.

Commercial Building Energy Renovations and Their Paybacks: How to Implement an Energy Improvement Project

Charleston, WV - Thursday, May 3, 2018

Determine the energy efficiency of your building

Learn how to perform an energy audit

Explore applicable energy codes

Examine historical data

Identify existing equipment for upgrades

Discuss return on investment and monitor actual energy conservation results

Dana J. Indermuhle *Principal and Lead Electrical Engineer at Swiss Valley Associates, Inc.*

Mr. Indermuhle, PE, has been active in building design for 16 years. He is principal and lead electrical engineer at Swiss Valley Associates, Inc. (SVA), a full-service mechanical, electrical and plumbing design firm in southeastern Ohio. SVA has completed energy projects for both new and existing buildings. Projects have ranged in scope from small restaurants and churches to city-wide energy audits. SVA is a leader in the design and implementation of variable refrigerant flow technology and in high-efficiency lighting. Clients report significant savings as a result of SVA's advanced energy management programs. Mr. Indermuhle loves to teach and listen. This interactive seminar is guaranteed to be inspiring and informative for those in the design engineering and facility maintenance fields. Attendees will enjoy an up-to-date presentation regarding the current status of wind and solar energy systems and advances in lighting efficiency in the United States.
